1. Product overview & users

FixoraX is a local-services marketplace for India. One app, two sides:

- **Customer — "I need help":** posts a task (category, address, details, budget in ₹), gets offers from nearby helpers, chooses one, chats, marks it done.
- **Helper — "I want to help":** sees open jobs, sends an offer (own price) or accepts at the customer's price, chats once chosen.

Login is by **mobile number + OTP** or **Google**. Guests may browse; posting or offering asks them to log in. Tasks, offers and chats are shared between phones through Firebase (Cloud Firestore) once the project is set up.

Design target

Bharat-first: Tier-2/3 towns, budget Android phones (3–4 GB RAM), weak networks, users who prefer Hindi or Hinglish, and older users with large font sizes.

Personas

Persona	Needs from the design
Ramesh ji, 52 — kirana owner, small town, Redmi 3 GB, font size at max, Hindi-first	Big text and buttons, no passwords, plain words, no dead ends, works on weak Jio signal
Priya, 21 — student, Tier-2 city, price-sensitive, Google login, dark mode on	Fast Google sign-in, clear prices in ₹, readable in dark mode, shareable
Amit, 34 — salaried, metro, impatient	Few taps, instant feedback, polished feel
Shared family phone — dual SIM	Pick SIM number, easy log out, data wiped on log out

2. Design principles

1 · One clear action per screen

Each screen has one blue primary button (56 dp tall). Secondary actions are outlined or text buttons.

2 · Plain, honest words

“Enter OTP”, “Send offer”, “Wrong OTP… 2 tries left”. No jargon such as “Authenticate”. No fake numbers, ratings or badges.

3 · No passwords

Mobile number + OTP or Google. New and returning users use the same screens; the account is created automatically.

4 · Readable for everyone

Navy text on white (16:1). Minimum text 12 sp. Layouts grow with the phone’s font size instead of clipping.

5 · Works on weak networks

Changes are saved on the phone at once and sent when the network returns; lists show the last known data; buttons never spin forever.

6 · Indian formats

+91 always visible, number cleaned automatically, ₹ with Indian grouping (₹1,25,000), dates DD/MM/YYYY in IST.

7 · Native Android feel

Material 3 components, edge-to-edge with safe areas, system Back closes sheets/chats first, “Press back again to exit” on the first tab.

8 · Hindi-ready

All texts live in one file (strings.xml). A Hindi version is drafted for review; layouts were checked with it.

3. Design system: colour

Primary Blue
#0B57FF
Primary buttons, links, selected tab, progress
White text on it: 5.5:1 ✓

Orange
#FF6B00
Brand “X”, helper accents, Post-a-task button
White text on it: 2.9:1 × (see open items)

Dark Navy
#0B1F44
Titles and main text
On white: 16.2:1 ✓

Text Grey
#6B7280
Secondary text, hints, timestamps
On white: 4.8:1 ✓

Border Grey
#E5E7EB
Card and field borders, dividers
Decorative

White
#FFFFFF
Screens, cards
—

Page Grey
#F8F9FA
Background behind card lists
Grey text on it: 4.6:1 ✓

Error Red
#C62828
Errors, Delete account
On white: 5.6:1 ✓

Status badges

New / success	#2E7D32 on #E8F5E9 · 4.6:1 ✓
Chosen / accepted	#0B57FF on #E3F2FD · 4.8:1 ✓
Waiting / offers	#B45309 on #FFF3E0 · 4.6:1 ✓
Cancelled / not chosen	#6B7280 on #F1F3F5 · 4.35:1 × small

Contrast is measured against the WCAG rule of at least 4.5:1 for normal text (readable in bright sunlight). The app is always shown in its light theme; on phones in dark mode the status-bar icons stay dark and OEM “force dark” is switched off, so colours never invert.

4. Design system: type, spacing, shape

Type scale (Roboto, system font)

Use	Size / weight	Sample
Screen title	26 sp · Bold	**Enter OTP**
Tab title	22 sp · Bold	**My tasks**
Brand	28–48 sp · ExtraBold italic	***FixoraX***
Card title	16 sp · Bold	**Kitchen tap is leaking**
Body / button	15–16 sp · Regular / SemiBold	Continue with mobile number
Secondary	13–14 sp · Regular, grey	Civil Lines, Kanpur · Budget ₹300 – ₹800
Smallest (badges, time)	12 sp · Bold / Regular	**New**

No text is smaller than 12 sp. All sizes scale with the phone's font-size setting (tested at 200 %).

Spacing (4/8-point grid)

Token	Value	Used for
xs	4 dp	Icon–text gaps
s	8 dp	Between chips, small gaps
m	12 dp	Between cards
l	16 dp	Card padding, list edges
xl	24 dp	Screen side padding (login screens)

Shape & size

Element	Rule
Buttons, fields	12 dp corners · min height 56 dp (48 dp in cards)
Cards	16 dp corners · 1 dp Border Grey · no heavy shadows
Role cards	24 dp corners
Badges	8 dp corners
Touch targets	at least 48 × 48 dp
Max content width	640 dp, centred (tablets, foldables, landscape)
Icons	Material Icons (one family), 16–24 dp

5. Components

PRIMARY BUTTON

Send OTP

Blue, white text, 56 dp, full width. Shows a spinner and disables itself while working (no double taps).

SECONDARY BUTTON

G Continue with Google

White with grey border. Google button uses the official four-colour “G”.

TEXT BUTTON

Explore without login

For low-emphasis actions: Change number, Cancel task, Not now.

MOBILE FIELD

+91 98765 43210

+91 always visible. Cleans “+91”, “0”, spaces, dashes on type/paste. Must be 10 digits starting 6–9.

OTP INPUT

4 8 2

One input drawn as six boxes: typing, Backspace, paste and SMS auto-fill all work; boxes shrink to fit 320 dp phones.

FILTER CHIPS

Active (2) | Done (0) | Cancelled

Scroll sideways at large font sizes instead of squeezing.

STATUS BADGES

New | 3 offers | Chosen

Text always says the status; colour is never the only signal.

AVATAR

R

First letter of the person’s name — no stock photos or fake faces.

BOTTOM NAVIGATION

⌂ Home | ≡ My tasks | ✉ Chats | ☺ Account

Material 3 navigation bar, icon + label on every tab, tabs keep their scroll position.

DIALOGS

Used only for decisions that matter: choose a helper, cancel a task, delete account, log in to continue. Destructive actions use red and say exactly what will happen.

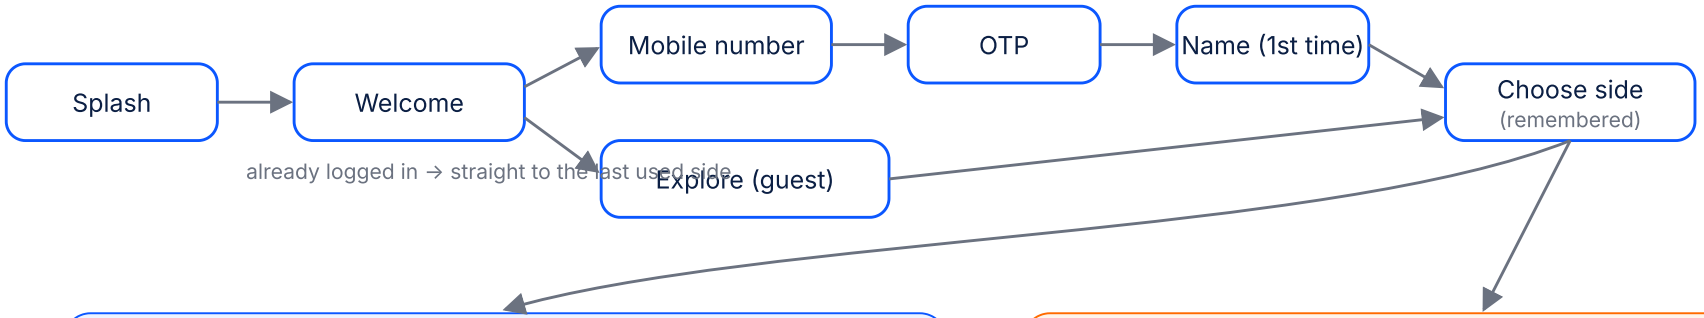

BOTTOM SHEET

“Send your offer”: price (₹, number pad) + optional message. System Back closes it.

CARDS

Task, job, offer and account cards: white, 16 dp corners, thin border, 16 dp padding; time and status on the first line, title second.

6. App map (navigation)

Customer — "I need help"

Home | My tasks | Chats | Account

Post a task (4 steps):

1 Category | 2 Location | 3 Details | 4 Review → Post

My tasks → offers → Choose helper → Chat → Mark as done

Home category tile or "Post a task" button starts step 1

Guests: posting asks to log in first

Account: edit name · switch side · help · policies · log out · delete

Helper — "I want to help"

Home | My jobs | Chats | Account

Home: Online switch · counts · jobs near you

Job card → Send offer (sheet) or Accept at customer's price

My jobs: Waiting / Chosen / Not chosen / Done → Chat

Guests: sending an offer asks to log in first

Back on Home: "Press back again to exit"

Account → "Switch to ..." moves between the two sides without logging out.

7. Key user flows

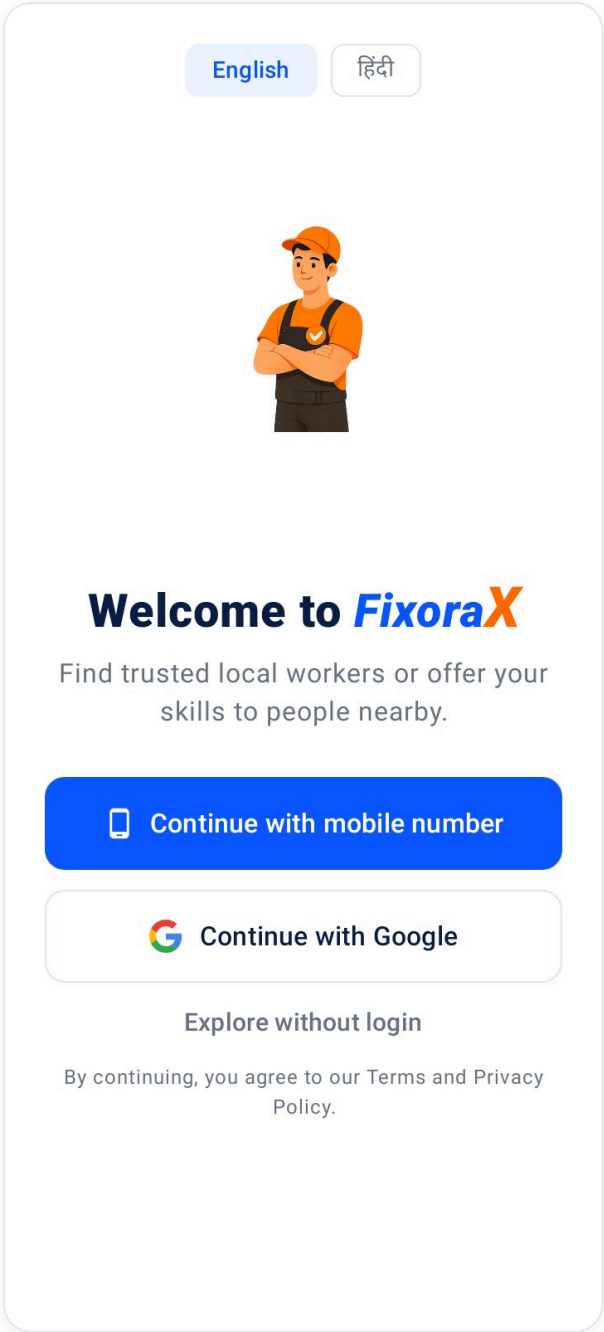

Flow	Steps	Taps*
First login (mobile)	Welcome → Continue with mobile number → pick SIM number (or type) → Send OTP → OTP fills itself from SMS (or type/paste) → Name → Continue → choose side	5–6
Login (Google)	Welcome → Continue with Google → pick account → choose side (name comes from Google)	3
Returning user	Open app → lands on the last used side, logged in	0
Post a task	Home: tap category → address → Continue → title (+ details, budget, photos optional) → Continue → Post task → “Task posted!” → See my tasks	5 + typing
Helper sends offer	Home: job card → Accept ₹800 (1 tap) — or Send offer → price + message → Send offer for ₹650	1–3
Customer chooses	My tasks → offer → Choose → confirm	2
Chat	My tasks / My jobs → Chat → type → Send (helpers also have quick replies)	2 + typing
Finish	Customer: My tasks → Mark as done	1
Log out / delete	Account → Log out (1 tap) · Delete my account → confirm (2 taps). Both wipe this phone’s data.	1–2
Wrong OTP	Message “Wrong OTP. Please check the SMS and try again. (2 tries left)”; after 3 wrong tries → “Tap Resend OTP”; resend after 30 s	—

* Taps counted from the screen where the flow starts; typing not counted.

8. Screens: login

Welcome → Mobile number → OTP → Name → Choose side

8.1 Welcome

First screen for new or logged-out users. Two equal ways to continue, plus browsing without login.

WHAT IS ON THE SCREEN

- English / हिंदी choice at the top (Hindi in preparation)
- Illustration that shrinks on small phones
- “Welcome to FixoraX” and one-line promise
- **Continue with mobile number** (primary) and **Continue with Google** (official G logo)
- Explore without login
- Terms and Privacy line (links appear once the pages exist)

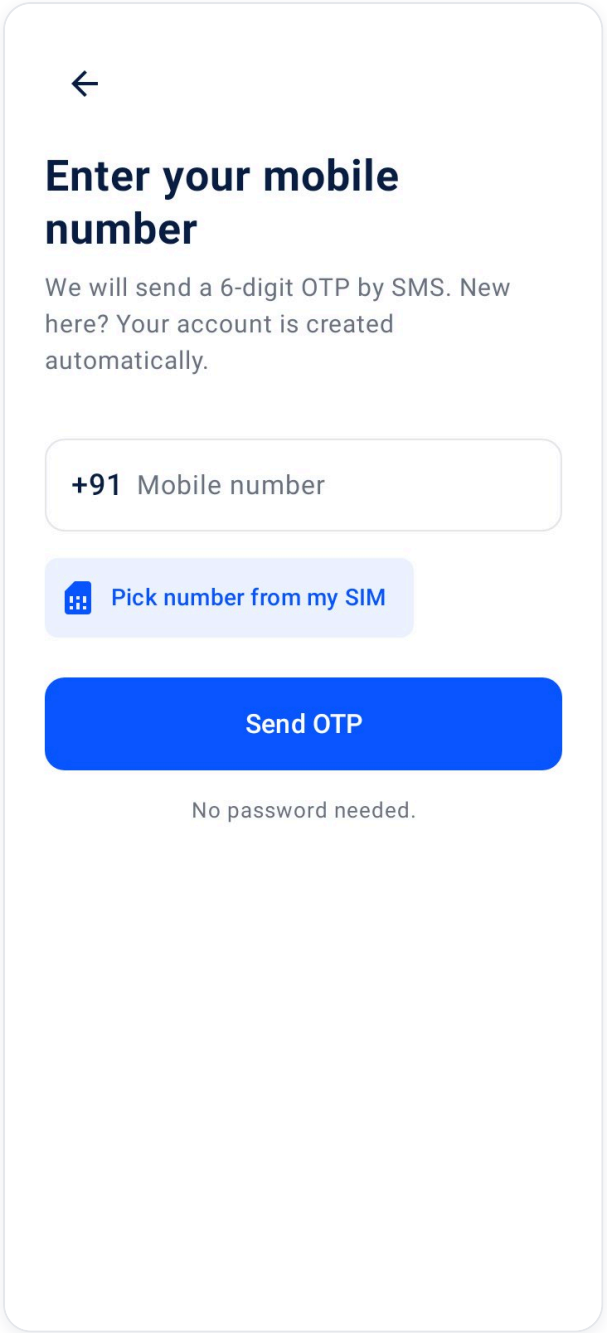

STATES

- Google busy: spinner in the Google button
- Google problem: plain message under the buttons (e.g. no Google account on the phone)

DESIGN NOTES

- Replaces the old Sign In / Create Account / password screens
- Whole screen scrolls at large font sizes

8.2 Mobile number

Enter or pick the mobile number to receive an OTP. Same screen for new and returning users.

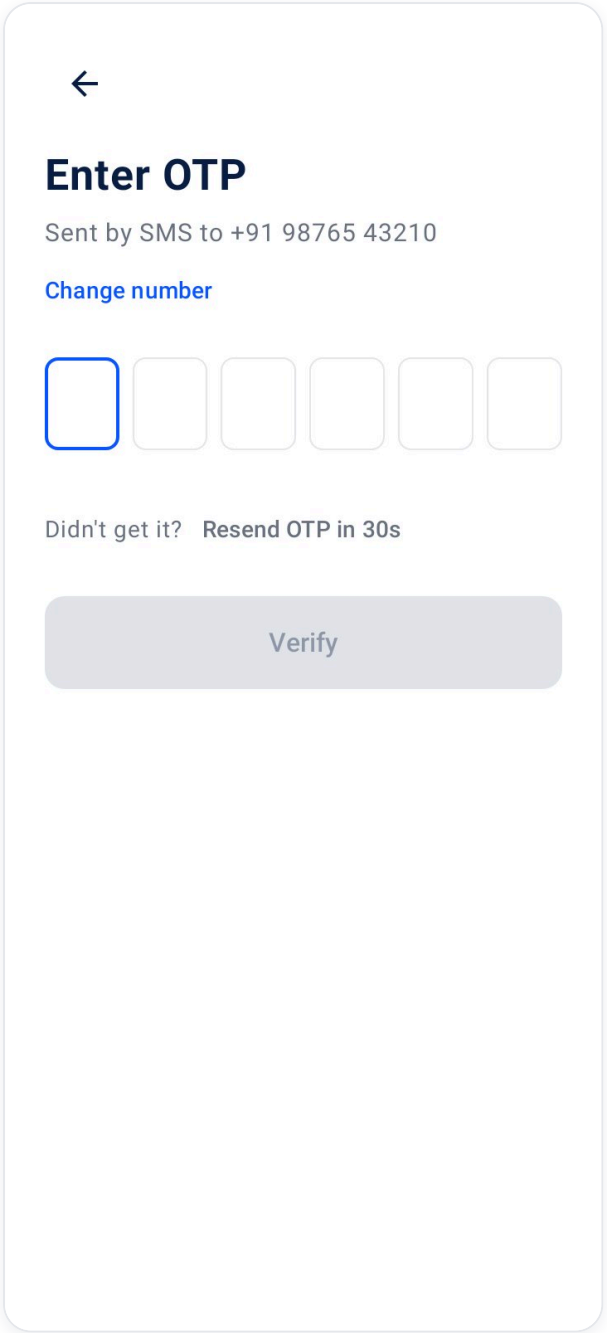

WHAT IS ON THE SCREEN

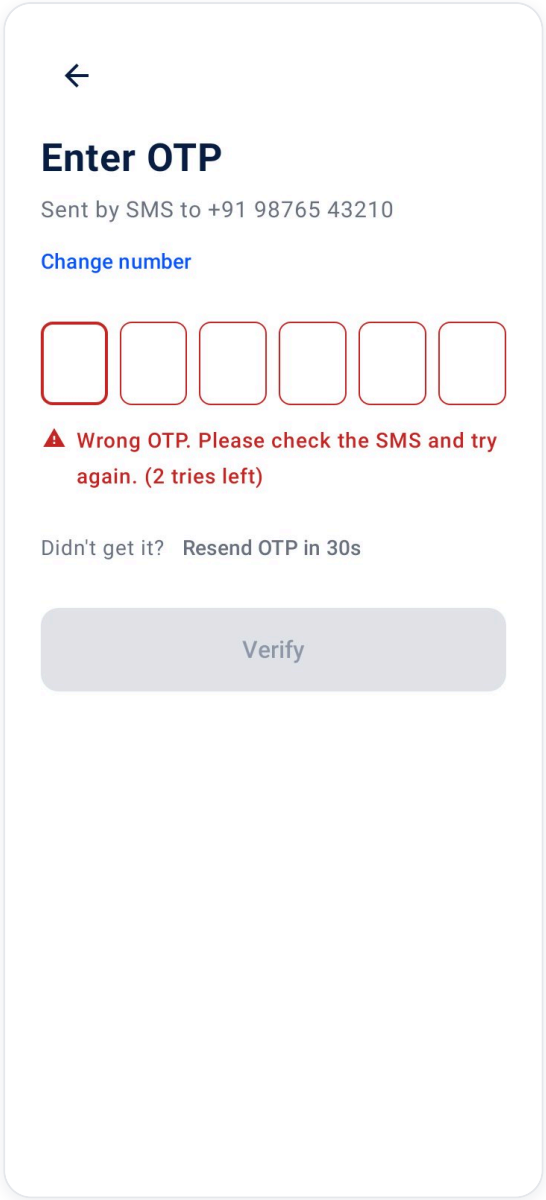

- +91 always visible
- Number pad keyboard; spaces, dashes, leading 0 and +91 removed automatically
- **Pick number from my SIM** — Google's phone-number hint, no permission needed, shows both SIMs
- **Send OTP** with spinner while sending
- "No password needed."

STATES

- Error under the field: "Enter your 10-digit mobile number" / "should start with 6, 7, 8 or 9"
- Too many tries, no internet: plain messages
- Test mode: yellow note "Use OTP 123456" (only until Firebase is set up)

8.3 Enter OTP

Wrong OTP

Type, paste or auto-read the 6-digit code.

WHAT IS ON THE SCREEN

- "Sent by SMS to +91 98765 43210" and **Change number**
- Six OTP boxes (one real input)
- Resend OTP in 30 s, then **Resend OTP**
- Verify — checks automatically when 6 digits are entered

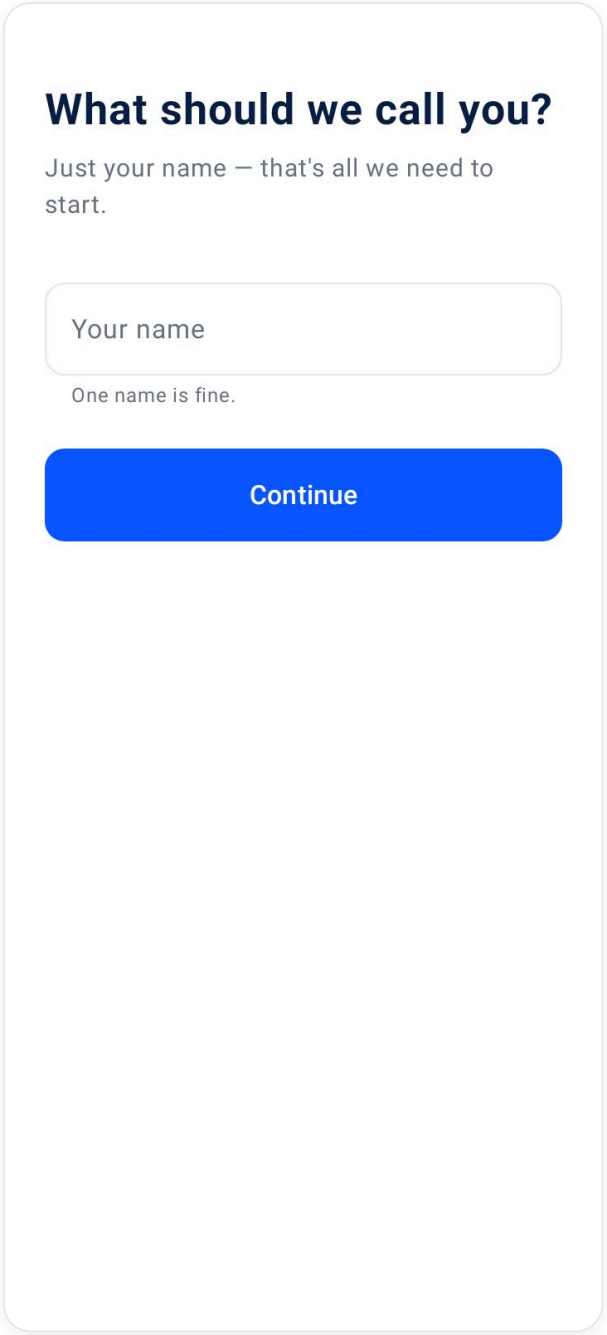

STATES

- Auto-filled from SMS: green tick "OTP filled automatically from your SMS"
- Wrong OTP: red boxes and "2 tries left"; after 3 → resend required
- Expired code: "This OTP has expired. Tap Resend OTP"

DESIGN NOTES

- Survives the app being closed while the user reads the SMS (number and code request are saved)

8.4 Name

Asked only once, after the first login. The only profile question.

WHAT IS ON THE SCREEN

- “What should we call you?”
- One field — a single name is fine (no surname required)
- Continue

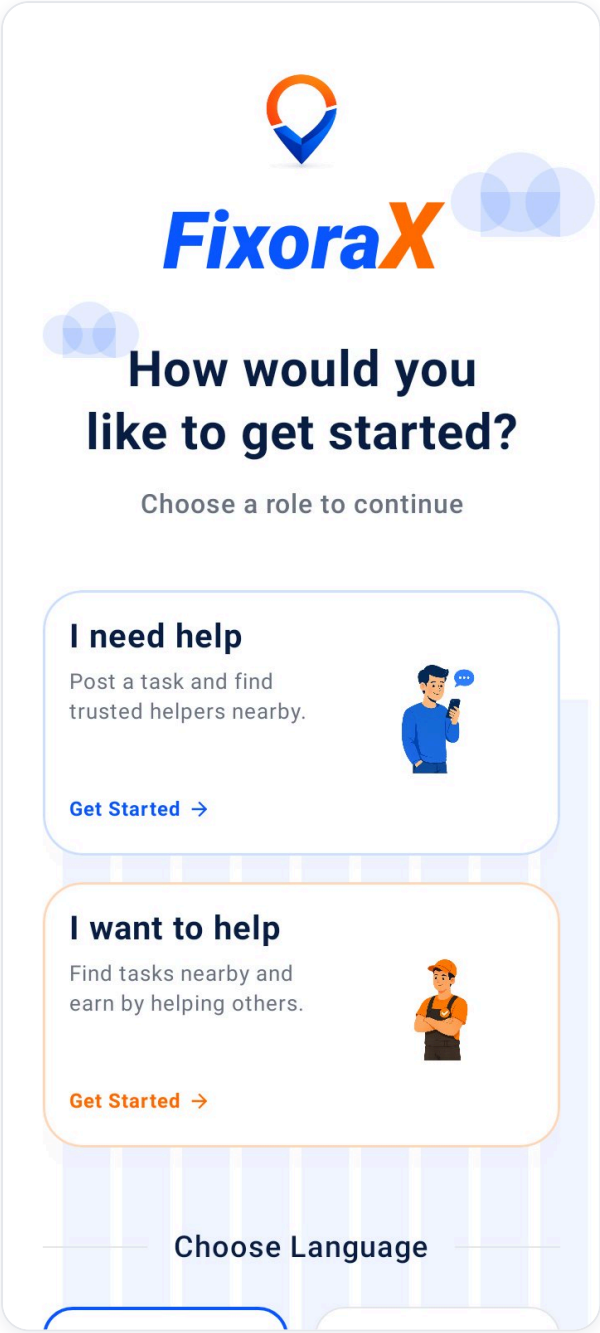

STATES

- Less than 2 letters: “Please enter your name (at least 2 letters)”

DESIGN NOTES

- Replaces the old 7-field profile (gender, date of birth, state, PIN...)

8.5 Choose your side

Shown once; the choice is remembered. Can be changed later from Account.

WHAT IS ON THE SCREEN

- FixoraX logo
- Two large cards: **I need help** (blue) and **I want to help** (orange) with illustrations
- English / हिंदी pills (this screen already has its own Hindi)

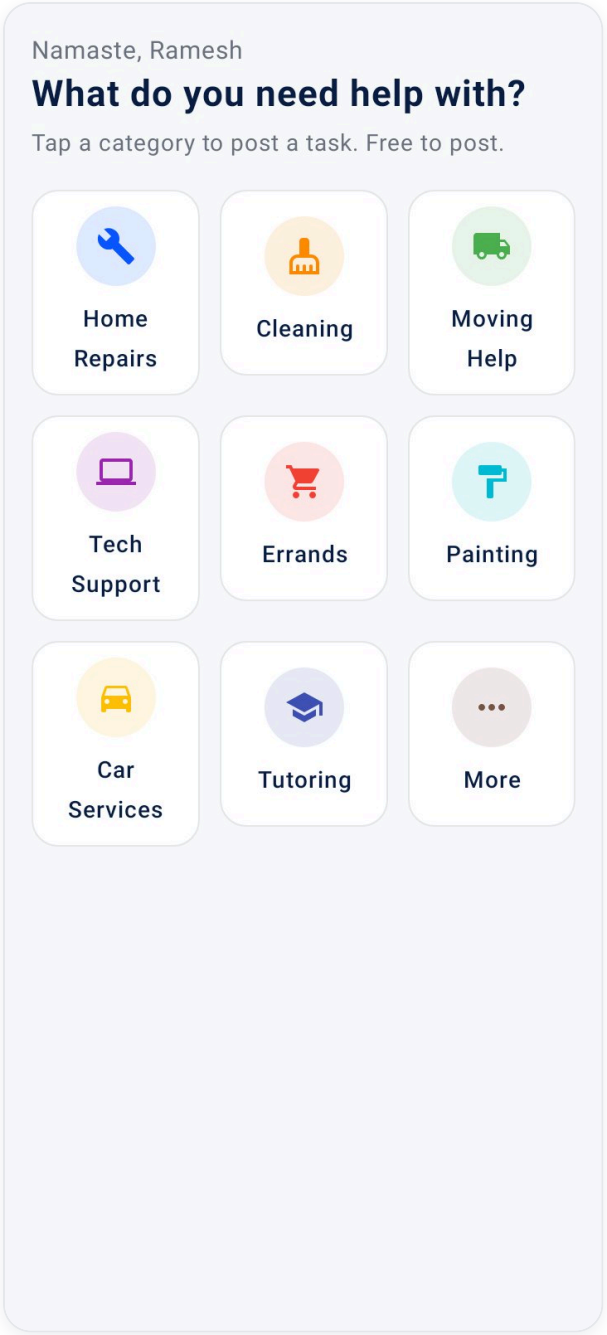

DESIGN NOTES

- Cards grow with large text instead of cutting it off

9. Screens: customer (“I need help”)

Home · Post a task (4 steps) · My tasks

9.1 Customer Home

Start a task in one tap.

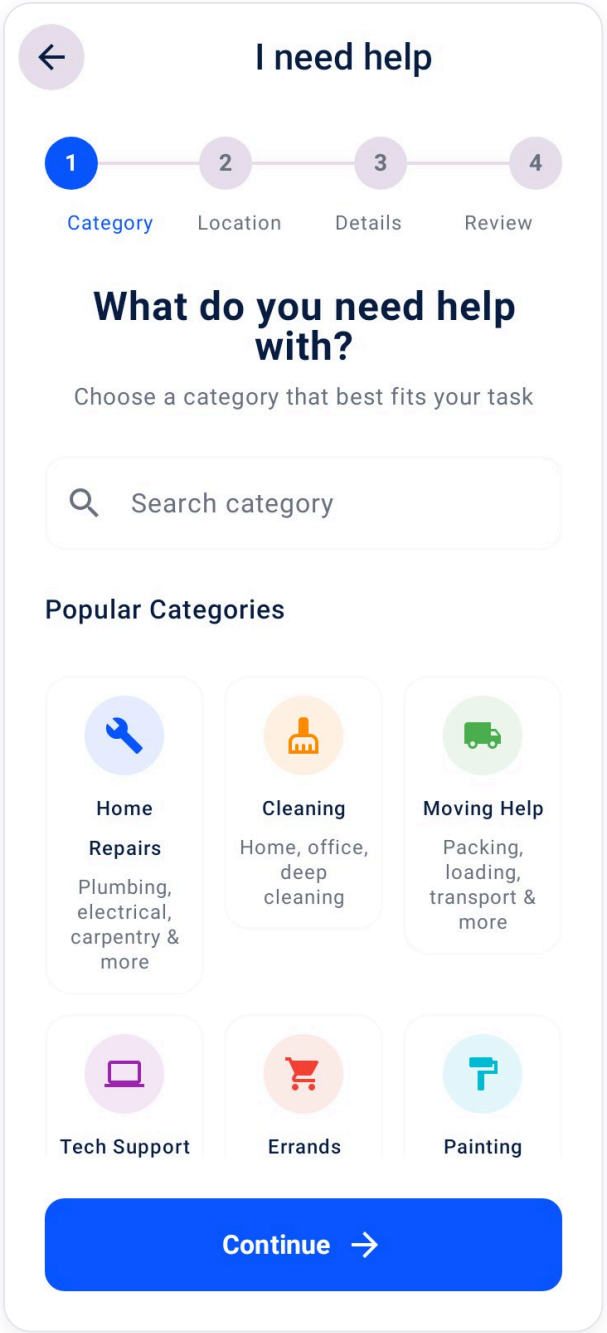

WHAT IS ON THE SCREEN

- “Namaste, Ramesh”
- “What do you need help with?” — “Free to post.”
- Nine category tiles: Home Repairs, Cleaning, Moving Help, Tech Support, Errands, Painting, Car Services, Tutoring, More
- Tapping a tile opens the task form with that category already chosen

STATES

- Guest: tapping a tile shows “Log in to continue”

9.2 Post a task — 1 Category

Choose what kind of help is needed.

WHAT IS ON THE SCREEN

- Step bar: Category · Location · Details · Review
- Search box filters categories
- Grid of category tiles (3 columns on phones, more on tablets, fewer at large font)
- Continue

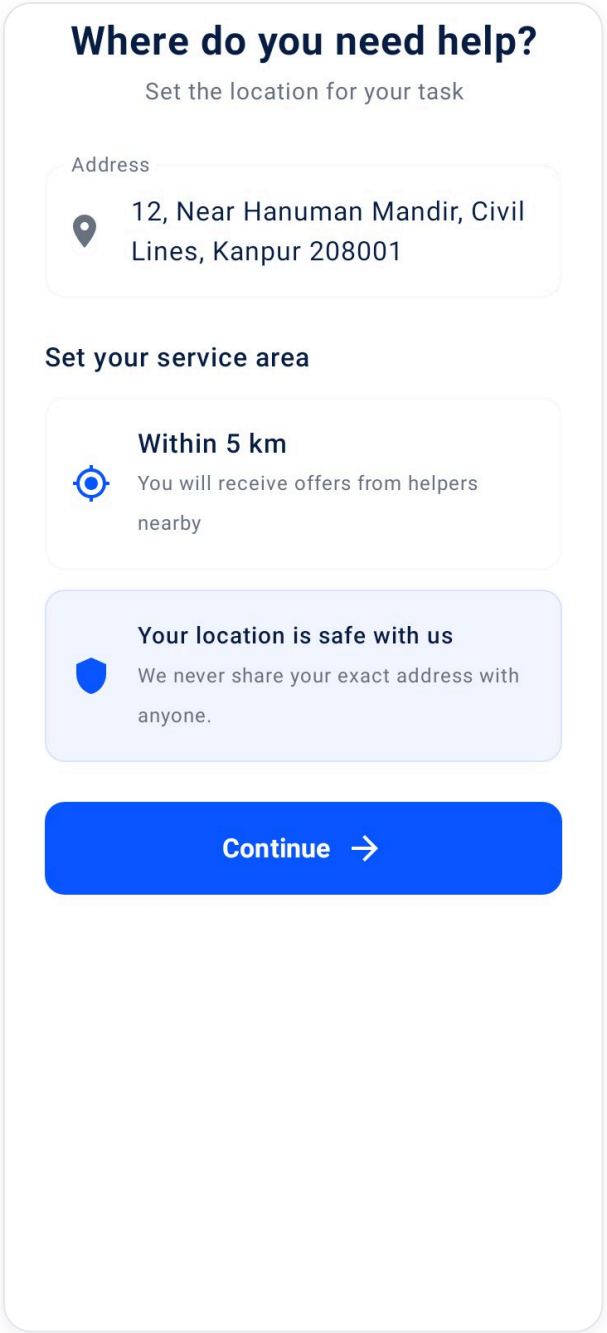

STATES

- No category chosen: “Please select a category to continue”

DESIGN NOTES

- Heading and search scroll with the tiles, so small phones see more tiles

9.3 Post a task — 2 Location

Where the help is needed.

WHAT IS ON THE SCREEN

- Address field with suggestions (house no., area, landmark, city — e.g. “Near Hanuman Mandir”)
- Service area (within 5 km)
- “Your location is safe with us”
- Continue

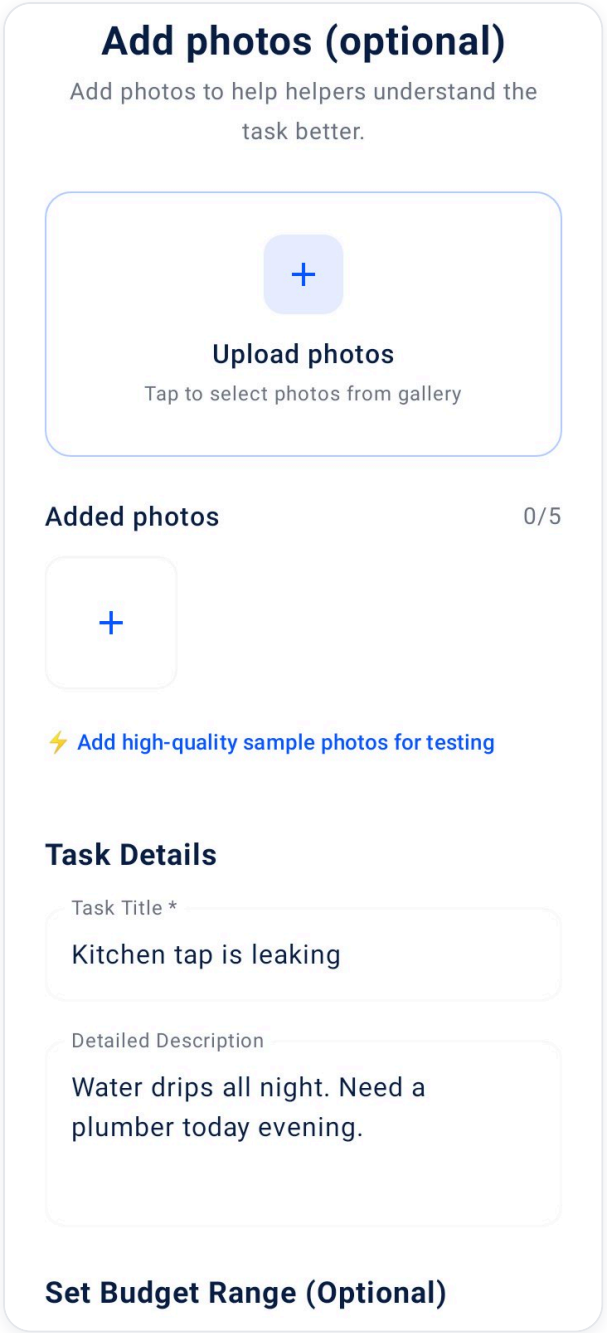

STATES

- Empty address: “Please enter the address where you need help”

DESIGN NOTES

- The fake “use my current location” switch was removed; real GPS is an open decision (D7)

9.4 Post a task — 3 Details

Photos (optional), title, description and budget.

WHAT IS ON THE SCREEN

- Upload photos (up to 5, from the gallery — no storage permission needed)
- Task title * and detailed description
- Budget range in ₹ (number pad, optional)
- Tips for better responses
- Continue

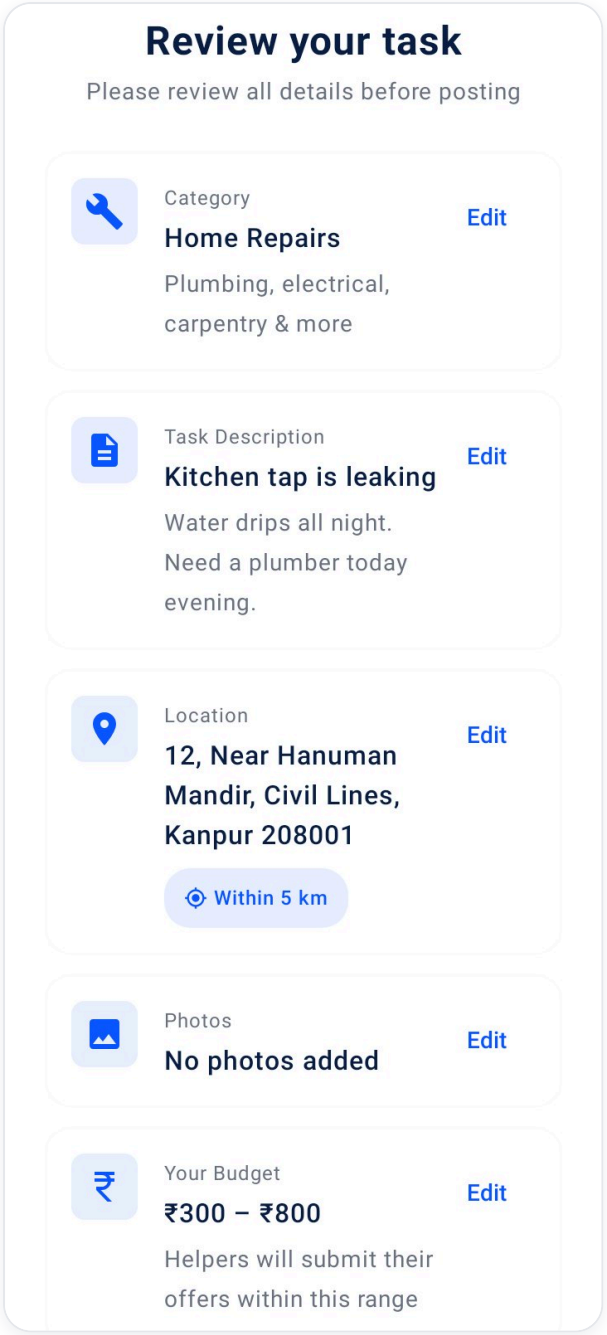

STATES

- No title: “Title is required to post the task”
- Max below min: “Max budget should be more than min budget”
- Photo could not be added: “Please check phone storage and try again”

DESIGN NOTES

- The ⚡ “sample photos for testing” link is visible only in test builds, never to real users

9.5 Post a task — 4 Review

Check everything before posting.

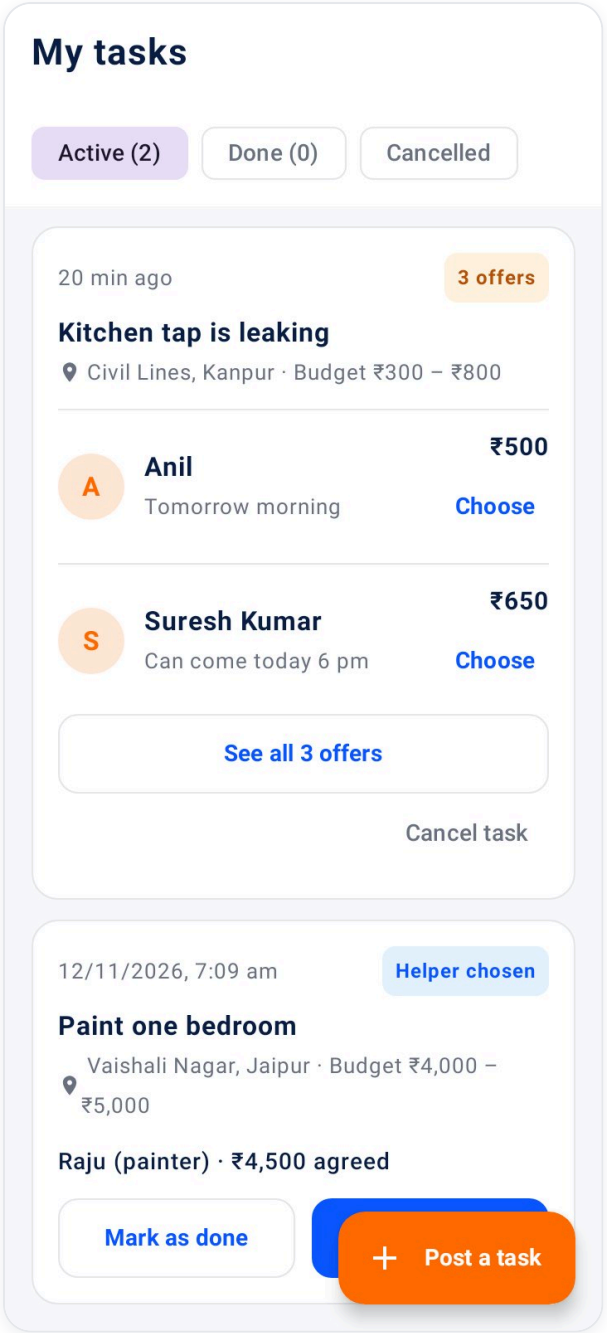

WHAT IS ON THE SCREEN

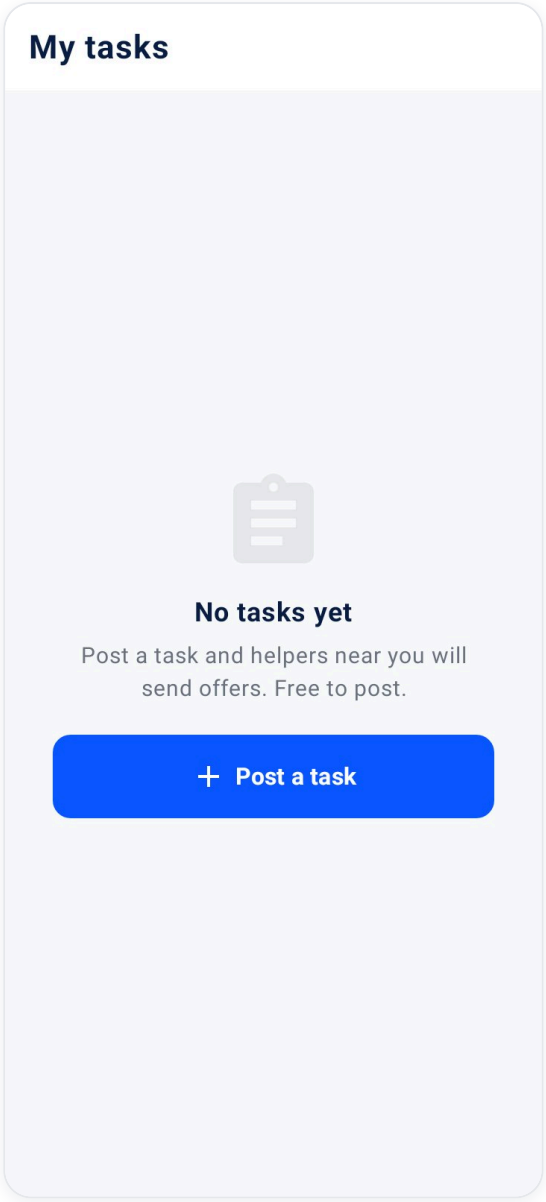

- Cards for Category, Task, Location, Photos, Budget — each with Edit
- “You’re in control” reassurance
- **Post Task** (disabled while posting — no double posts)
- Then: “Task posted!” → See my tasks

STATES

- Posting failed: “Could not post your task. Please check your internet and try again.”

9.6 My tasks

Empty state

Everything the customer has posted, with offers from helpers.

WHAT IS ON THE SCREEN

- Chips: Active (2) · Done · Cancelled
- Task card: posted time, status badge (“3 offers”, “Waiting for offers”, “Helper chosen”), title, place, budget
- Offers cheapest first: name, message, price, **Choose** (asks to confirm)
- See all N offers · Cancel task (asks to confirm)
- Chosen helper: “Raju · ₹4,500 agreed”, **Mark as done**, **Chat**
- Orange **Post a task** button

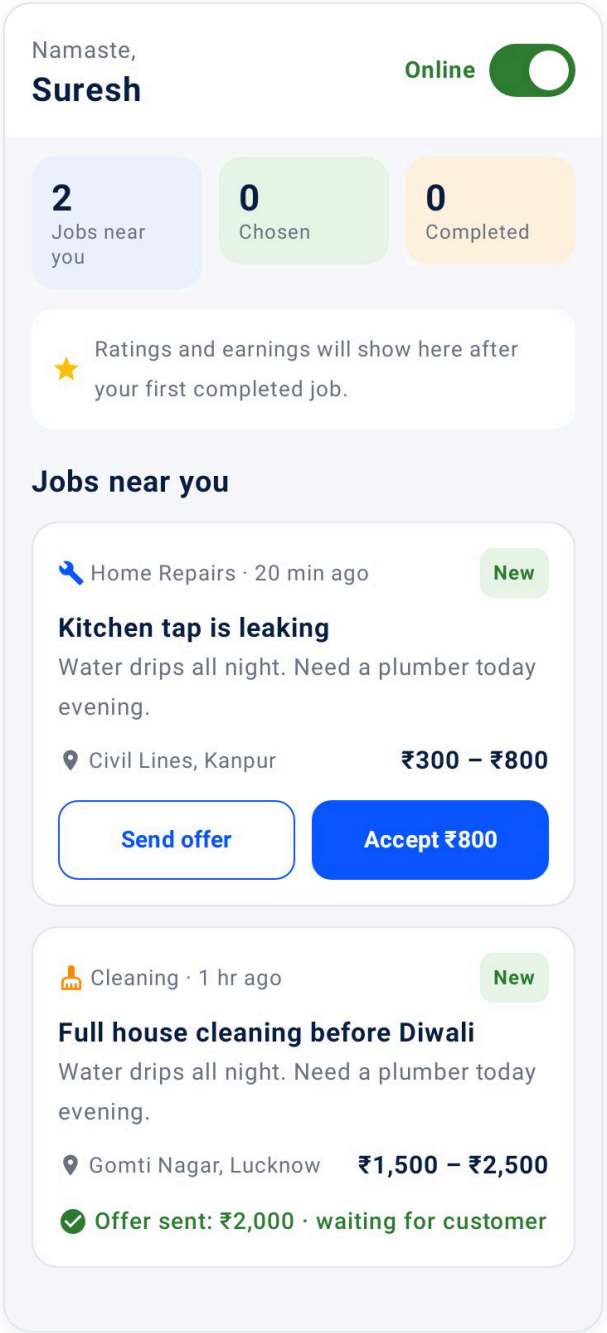

STATES

- Empty: “No tasks yet — Post a task and helpers near you will send offers. Free to post.”

10. Screens: helper (“I want to help”)

Home · My jobs

10.1 Helper Home

See open jobs nearby and send offers.

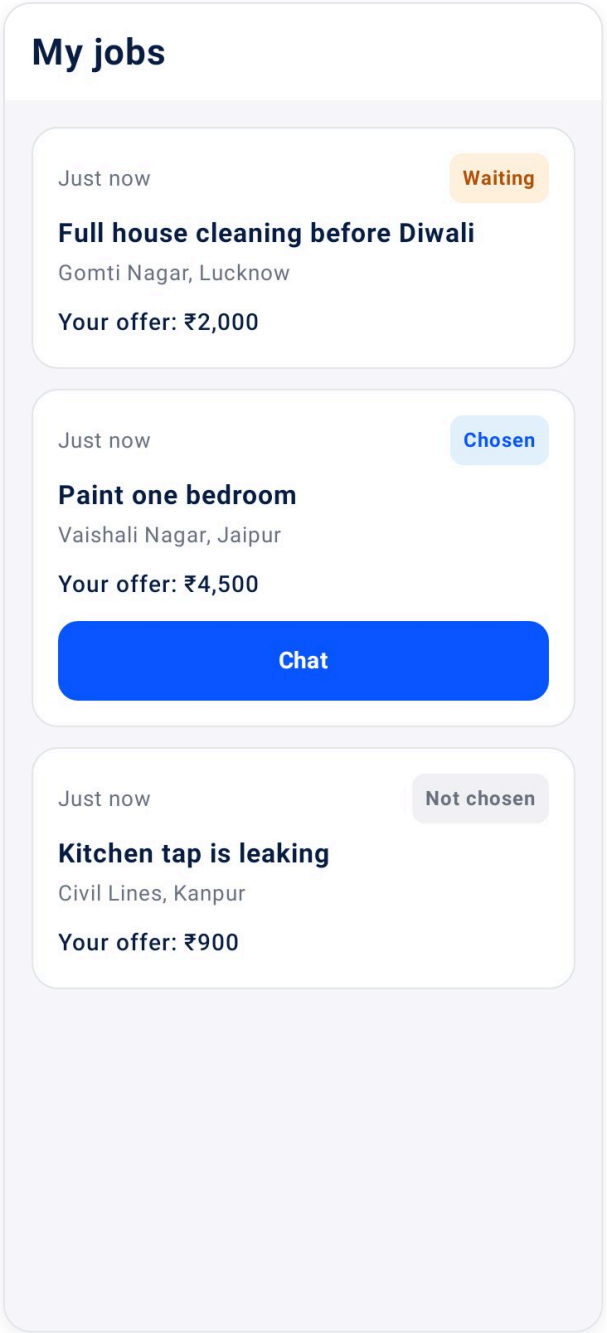

WHAT IS ON THE SCREEN

- "Namaste, Suresh" and the **Online** switch (saved)
- Real counts: Jobs near you · Chosen · Completed
- "Ratings and earnings will show here after your first completed job." (no fake numbers)
- Job card: category, time, New badge, title, details, place, budget
- **Send offer** (own price + message) or **Accept ₹800** (customer's price)
- After sending: "Offer sent: ₹2,000 · waiting for customer"

STATES

- Loading: grey skeleton cards
- Offline switch: "You are offline. Turn on Online to see new jobs."
- No jobs: "New jobs appear here automatically."
- Own task: "Posted by you", no offer buttons

10.2 My jobs

Every offer the helper has sent and what happened.

WHAT IS ON THE SCREEN

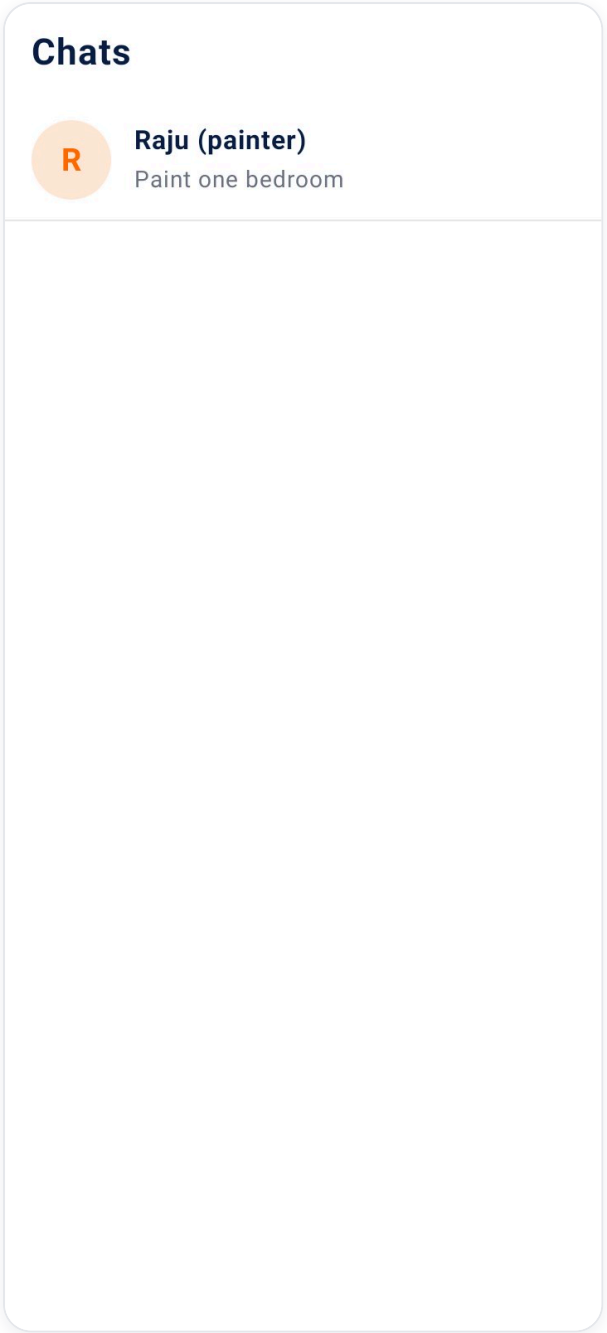

- Badges: Waiting · Chosen · Not chosen · Done
- Task title, place, “Your offer: ₹4,500”
- **Chat** when chosen

STATES

- Empty: “Offers you send appear here.” + See jobs near you

11. Screens: chat & account

11.1 Chats

One conversation per task, between the customer and the chosen helper only.

WHAT IS ON THE SCREEN

- List: avatar, other person’s name, task title
- Tap to open

STATES

- Empty (customer): “Chats appear here after you choose a helper.”
- Empty (helper): “Chats appear here after a customer chooses you.”

11.2 Conversation

Helper view with quick replies

Simple messaging; works on weak networks (messages are sent when the network returns).

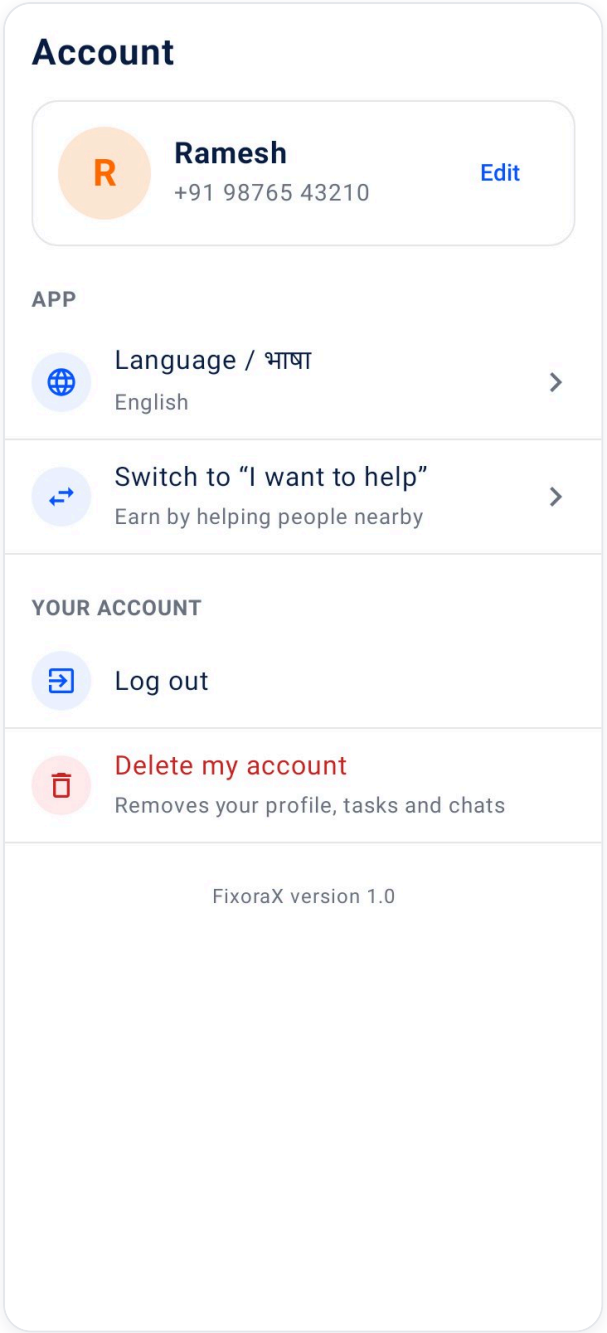

WHAT IS ON THE SCREEN

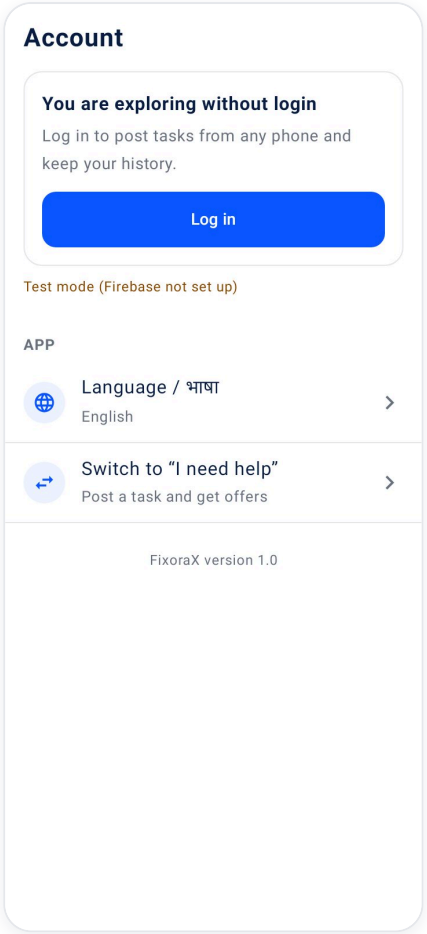

- Header: name, task and agreed price
- My messages blue on the right, theirs white on the left, with IST time (e.g. 7:59 am)
- Message box with Send
- Helpers get quick replies (“I can do this today.”, “I’ll arrive in 20 minutes.”)

DESIGN NOTES

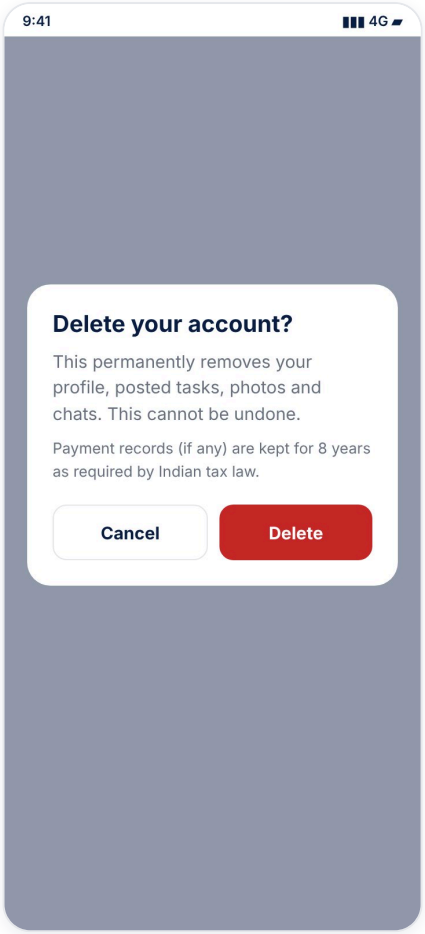

- System Back closes the conversation first

11.3 Account

Guest

Delete confirmation (approved design)

Profile and everything about the account in one place.

WHAT IS ON THE SCREEN

- Profile card: initial avatar, name, number, **Edit**
- Language / भाषा
- Switch to “I want to help” / “I need help”
- Help: WhatsApp, Call support, Common questions (appear once the numbers/links are set)
- Legal: Privacy Policy, Terms (appear once the pages exist)
- Your account: **Log out** · **Delete my account** (red, asks to confirm)
- App version

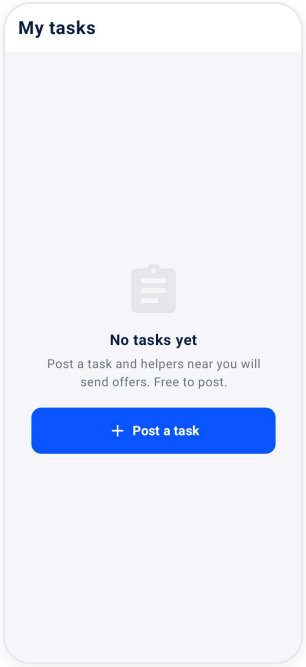

STATES

- Guest: “You are exploring without login” + Log in
- Delete needs a recent login: “please log out, log in again, then delete”

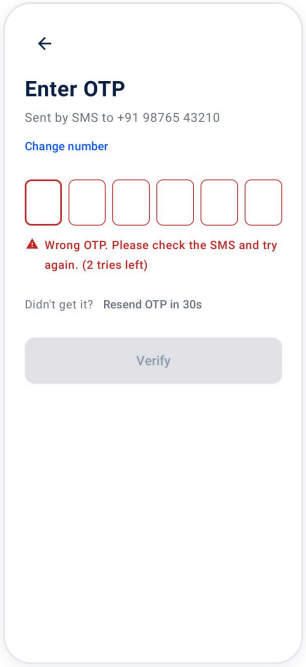

DESIGN NOTES

- Log out and delete both remove this phone’s tasks, offers, chats and photos (shared family phones)

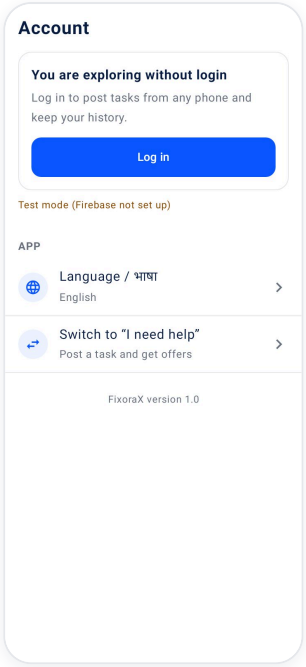

12. States: empty, error, offline, guest

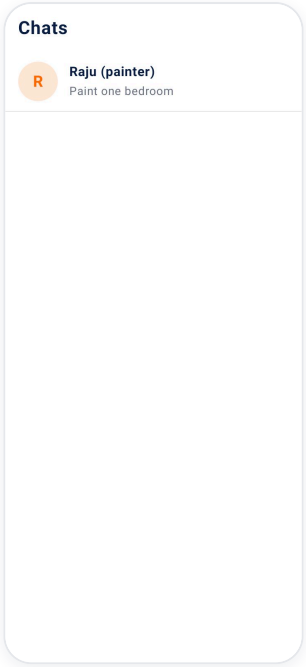

Empty — My tasks

Error — wrong OTP

Guest — Account

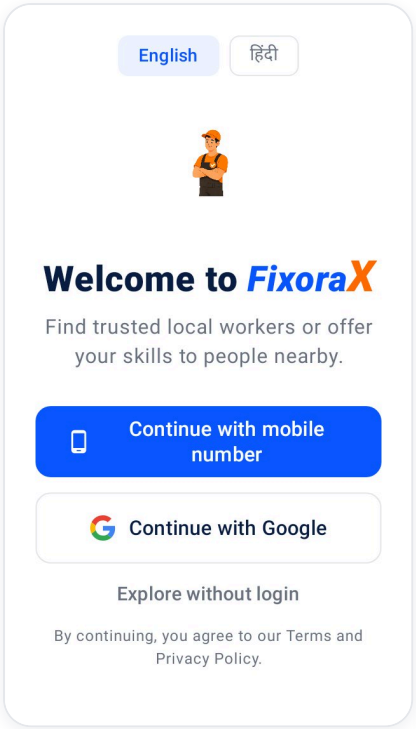

List

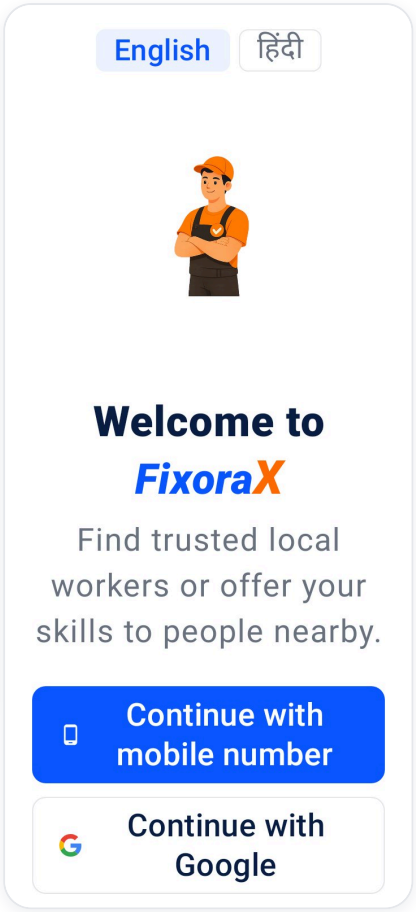

State	Rule
Loading	Grey skeleton cards that look like the content (no full-screen spinners); a spinner only inside the button being pressed.
Empty	Icon, one plain sentence, and one action (e.g. Post a task / See jobs near you).
Error	Says what happened and what to do next, next to the place it happened. Input is kept.
Offline / weak network	Last loaded data stays visible; new posts, offers and messages are saved on the phone and sent later.
Guest	Can browse; posting a task or sending an offer opens "Log in to continue" (mobile number or Google, "Not now").
Test mode	Before Firebase is set up: a yellow note on login screens and in Account. Never shown once real login is on.

13. Small phones & large font (1/2)

WELCOME

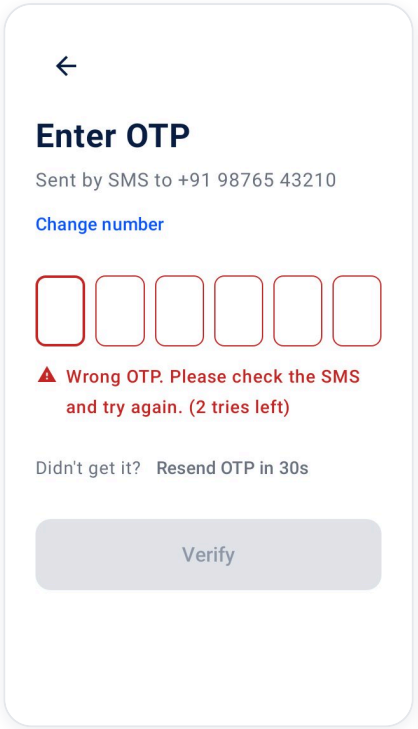

Small phone 320×568

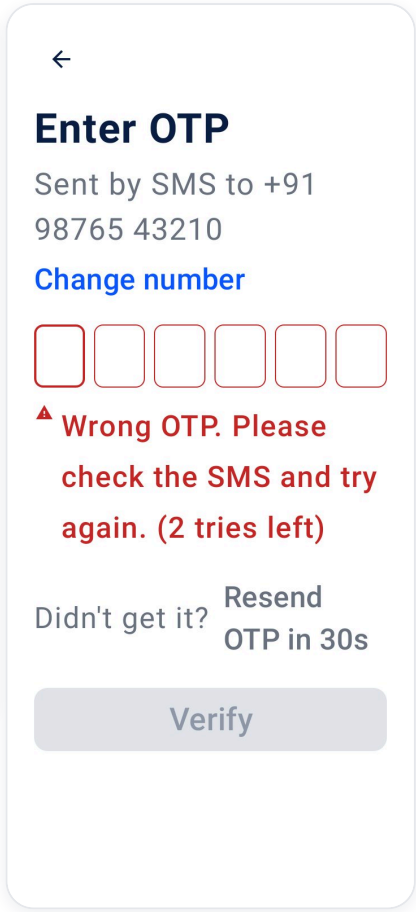

Largest font (200 %)

OTP

Small phone 320×568

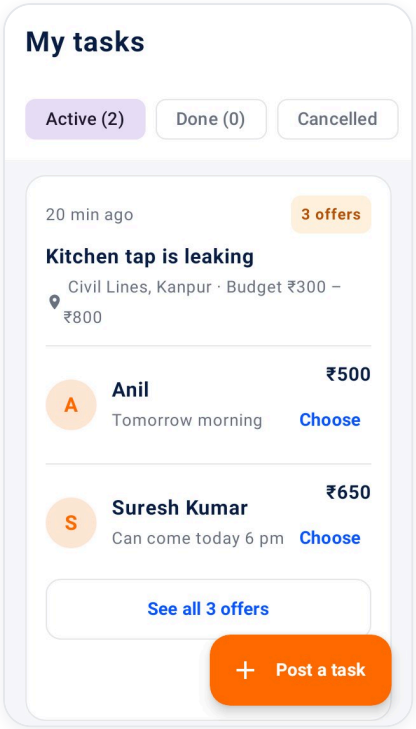

Largest font (200 %)

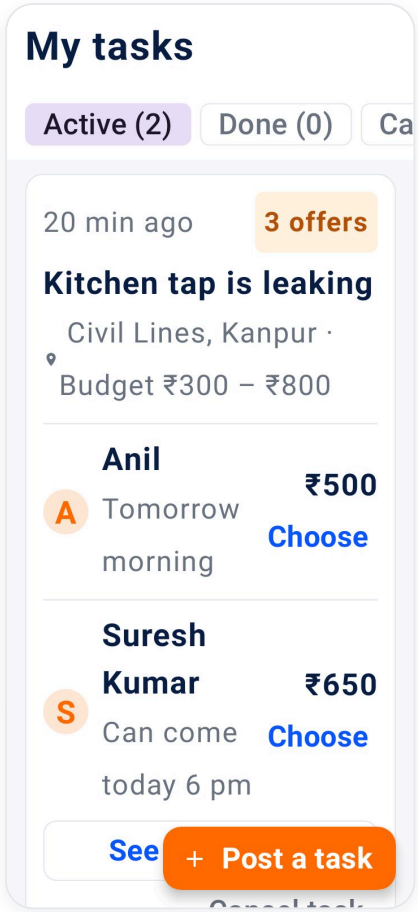

Rules: nothing has a fixed height that holds text; screens scroll; rows wrap or scroll sideways; content stays clear of the status bar, notch and navigation bar; the keyboard never hides the field being typed.

13. Small phones & large font (2/2)

MY TASKS

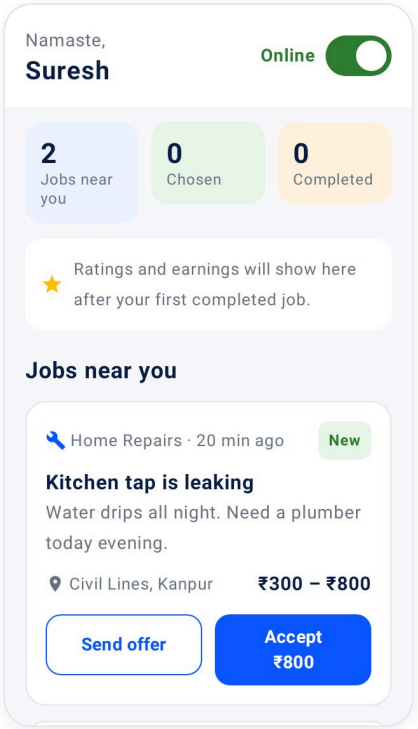

Small phone 320×568

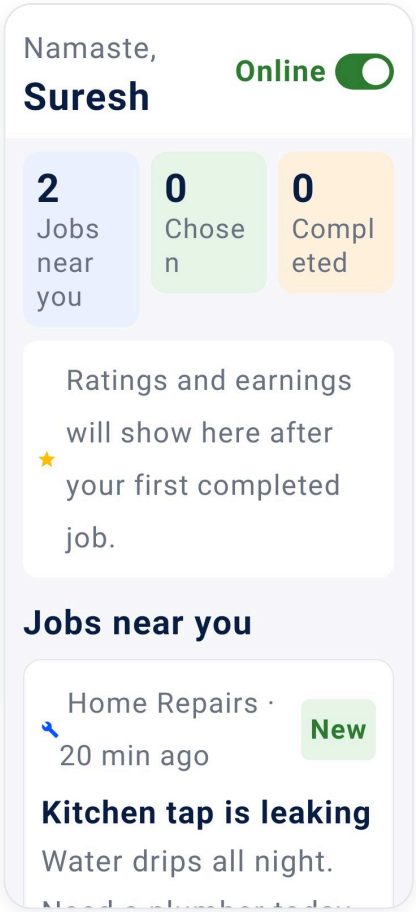

Largest font (200 %)

HELPER HOME

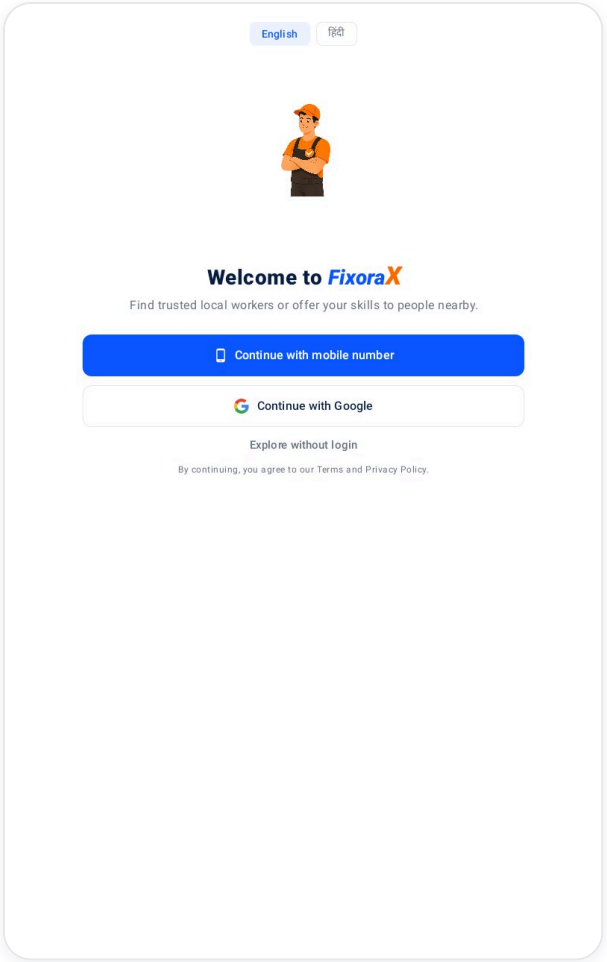

Small phone 320×568

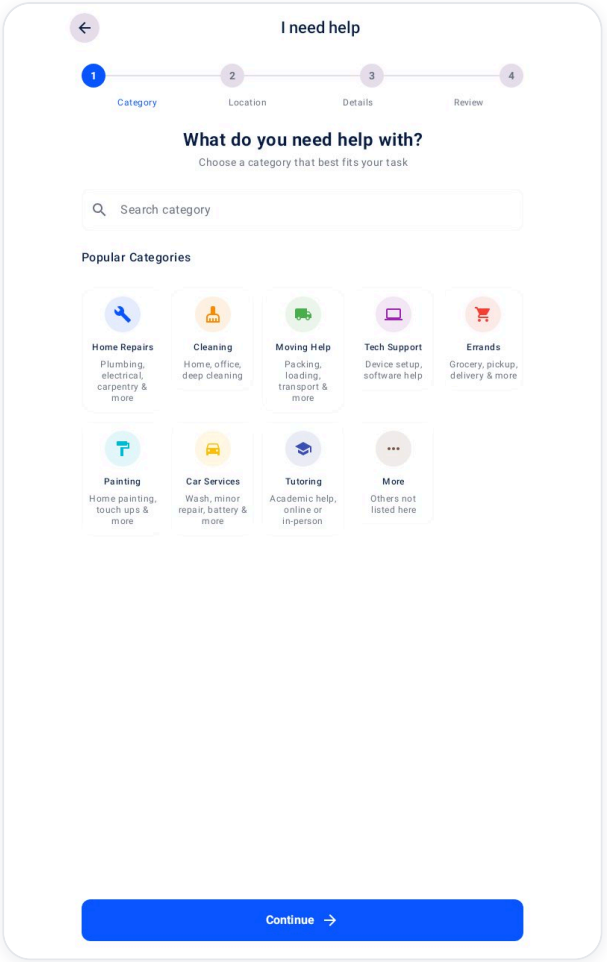

Largest font (200 %)

Rules: nothing has a fixed height that holds text; screens scroll; rows wrap or scroll sideways; content stays clear of the status bar, notch and navigation bar; the keyboard never hides the field being typed.

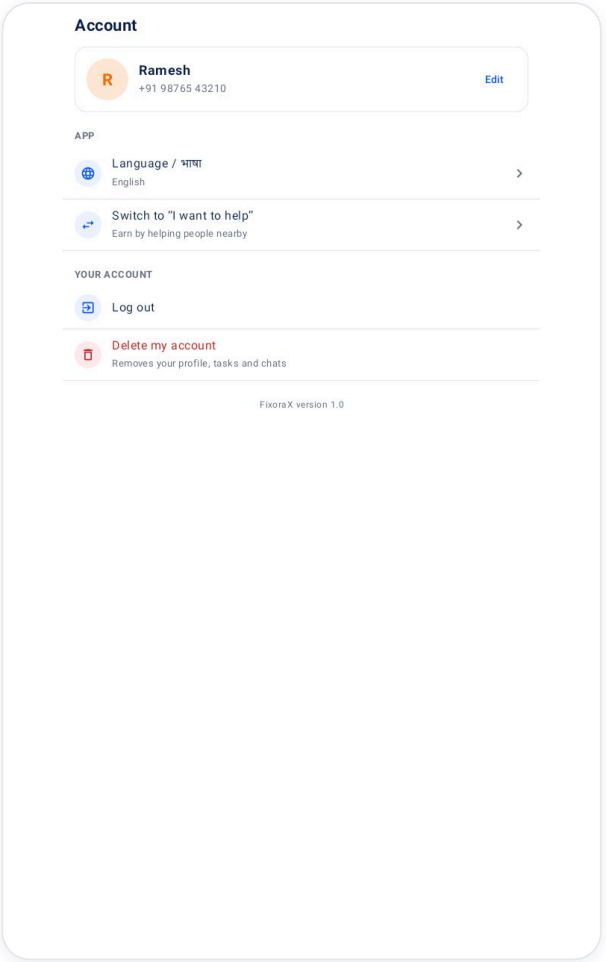

13. Tablets & foldables

Welcome

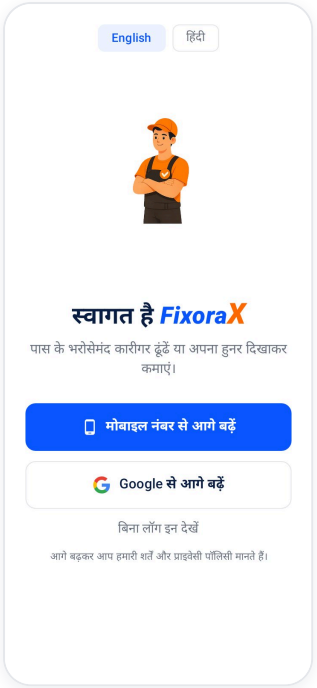

Category (5 columns)

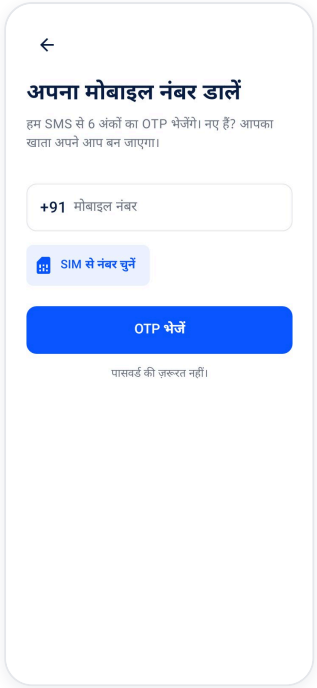

Account

On tablets, unfolded foldables and landscape, content keeps a readable maximum width of 640 dp and is centred instead of stretching buttons across the screen. Android 16 ignores portrait locks on large screens, so the app does not rely on one.

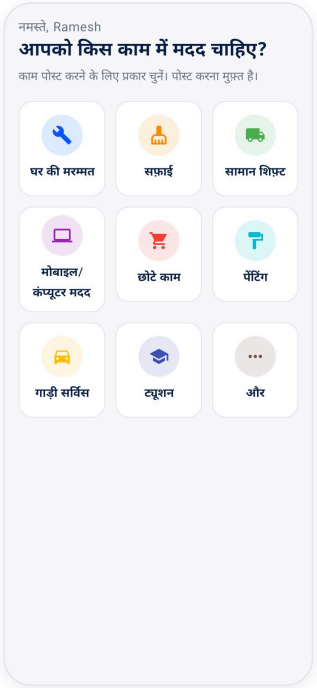

14. Hindi (draft, for review)

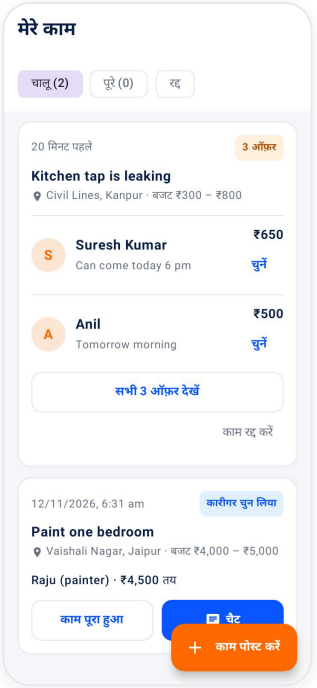

स्वागत

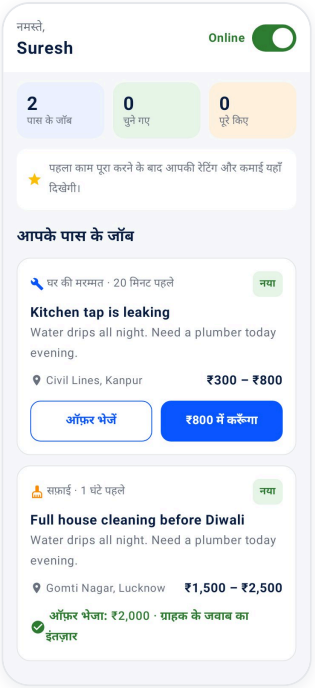

मोबाइल नंबर

होम

मेरे काम

कारीगर होम

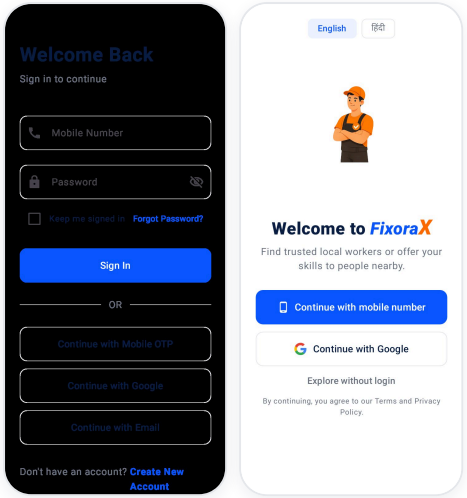

खाता

All 247 texts have a simple-Hindi draft (docs/i18n/HINDI_REVIEW.md). Everyday words stay in English (OTP, SMS, Google, Online, Chat, WhatsApp). The draft is **not yet in the app** — it goes in after the owner or a native speaker approves it. These screenshots confirm the layouts fit Hindi text.

15. Accessibility

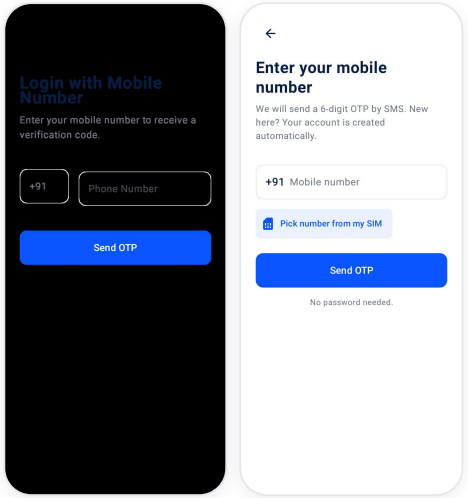

Area	What the design does	Status
Contrast	Main text 16:1, secondary text 4.8:1, buttons 5.5:1	✓ · two exceptions below
Text size	Minimum 12 sp; follows the phone's font size; tested at 200 %	✓
Touch targets	Buttons 48–56 dp; list rows at least 56 dp	✓
Screen readers	Icon-only buttons have labels (Back, Send, Remove photo); OTP field announced as "6-digit OTP"; decorative images silent	✓ (check with TalkBack on a phone)
Colour meaning	Every status badge has words, not only colour	✓
Dark mode phones	App stays light; status-bar icons stay dark; OEM force-dark off	✓
Language	Plain English now; Hindi draft ready	⏳ Hindi approval
White text on orange (Post-a-task button)	2.9:1 — below 4.5:1	× Fix: darker orange `#C2410C` for the button (5.2:1) or navy text
Grey on light grey ("Cancelled" badge)	4.35:1 — just below 4.5:1	× Fix: text `#4B5563` (6.9:1)

16. Before → after (from the audit)

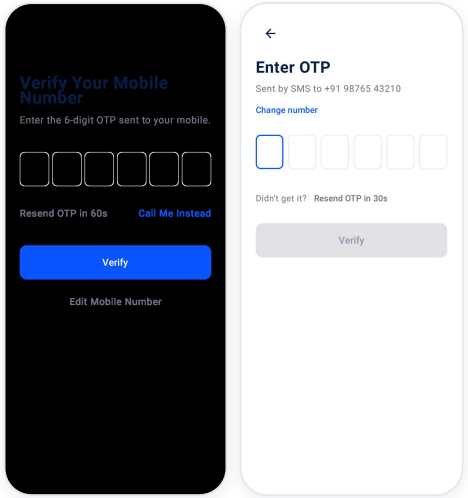

Before After

Black, unreadable sign-in with passwords → simple welcome

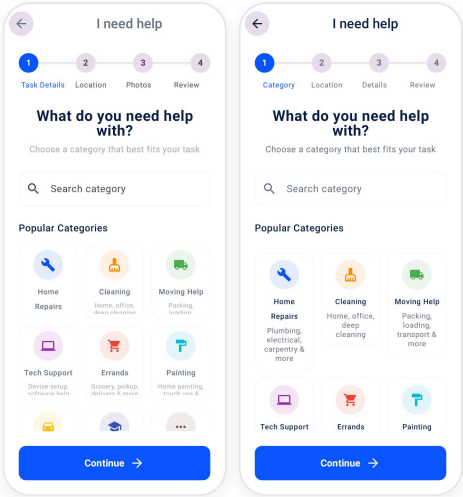

Before After

Unreadable → clean +91 field and SIM picker

Before After

Six separate boxes (no paste) → one OTP input

Before After

Wrong step names, clipped tiles → fixed

17. Open design items

Item	Why it matters	Needs
Contrast fixes (orange button, Cancelled badge)	Readability in sunlight	OK to change colours
Hindi in the app	Hindi-first users (Ramesh ji)	Approval of the Hindi draft
Task photos visible to helpers	Helpers quote better with photos	Firebase Storage (next technical step)
Notifications (“You got a new offer”)	Users otherwise must open the app to check	Firebase Cloud Messaging + small server function
Real location / distance	“Jobs near you” is not sorted by distance yet	Decision D7 (location / maps)
Payments (UPI first)	If the business takes money in the app	Decision D6
Help, policy and deletion pages	Play Store requirement; trust	Your WhatsApp/phone number and page links (D10)
Ratings & reviews, helper verification	Trust between strangers	Future design batch
Dark theme	Optional; the app is deliberately light today	Future
